

IN THE SPECIFICATION:

---On page 7, please replace lines 14-15 with the following:

The minor component, when a polymer, may also be referred to as the first polymer component, and the major component, when a polymer, as the second polymer component.

---On page 14, please replace lines 13-14 with the following:

Values of polymer components are expressed in weight percent, for example, 90:10 refers to 90% of the second component by weight, and 10% of the first component by weight.

---On page 14, please replace lines 15-18 with the following:

When a third component, such as compatibilizing block copolymer, is included in the blend or mixture, although it is expressed herein as a percent, for example, as 5%, it refers to an additional 5 parts by weight added to the already one hundred parts total weight of the first and second polymer components combined, or in other words, 90:10:5.
